

Features that make SculptureSeat an excellent value:

Durability

• Modules are constructed of one-piece injection molded high strength polyethylene which resists stains and will not splinter or warp. The molded-in solid color will not fade or wear out.

❶ For maximum rigidity, the specially designed attaching clamp provides a steel-to-steel connection of the module to the 14-gauge galvanized steel nose beam.

❷ Each module incorporates full 1/2" perimeter interlocks to secure one module to the next for increased strength.

❸ Five vertical and two lateral ribs inside each module provide superior strength and are positioned for easy cleaning.

Comfort

❹ Plastic seat modules are anatomically-contoured to achieve greater spectator comfort.

❺ Each 18"-wide Interlocking module provides a minimum adult seat height of 16-1/2" for greater comfort, even over extended periods.

• Contoured module produces more leg room.

Appearance

• Strong horizontal lines of a sculptured face and wide range of available colors dramatically increases aesthetic appeal and provides for interior design or school color options.

❻ Modular design concept clearly delineates each seat space and allows for ease of replacement should it ever become necessary. A recess in the module allows for optional seat numbering.

• Modules are available in 10" and 12" depths depending upon front to back row spacing and code requirements.

❼ Optional seat numbers shown.

Easy Maintenance

- Easy to clean. easy to sweep –no obstructions.
- No debris traps or exposed hardware.
